INGLIZ TILI 9-SINF

1-BILET

1. Complete the sentence with the correct form of the verb.

We have had our house **painted** this year.

2. Read the paragraph and answer the questions. Millions of people all over the world speak English as a foreign or second language. We wonder whether English will still be the international language in the next century. Many people think that English will continue to be the international language. It is the language of many countries – the USA, Canada, Australia, the UK, New Zealand, and an official language of many others such as South Africa. Others think it depends on people. There are more than one billion people in China, so the language that is spoken by the most people will be the international language. How do you think? Can English still be the international language in the next century?

In my opinion, English can still be the international language in the next century. Because millions of people all over the world speak English as a foreign or second language. And it is the first and second language in most countries.

3. Speak on the theme “My learning strategies”. What do you do to learn effectively?

I think without learning strategies, it's rather difficult to learn something. I have my own strategy to learn languages. Firstly, I create atmosphere for myself. If I learn English, I listen to English music, I read English newspapers and magazines and even I watch English movies and soap operas instead of Uzbek. Besides that, I find a pen pal from abroad and write him/her messages. I introduce our country to my friend. And I receive back a lot of useful information about his/her country. I think most efficient way of learning language is to learn it with group. I enroll to speaking clubs, I find a speaking partner and practice together with him/her. That's my strategy to learn English. In my opinion it's the best way for me.

2-BILET

1. Complete the sentence.

If it is a holiday, pupils **don't go** to school.

2. Read the paragraph and answer the questions. Being a schoolteacher is very demanding. School teachers teach five-six classes a day with thirty-five kids to a class. They spend their evenings preparing lessons and correcting papers. At the end of the day, they can be very tired but most teachers like their jobs. They are pleased by young minds. Their job is really hard. They should be paid more. How do you think? Should schoolteachers be paid more or are they being paid enough?

I think teachers should be paid more. They work really hard, they teach five-six classes a day but they are not paid enough.

3. How did the Internet change our life?

Just a century ago we didn't even know about computers and the Internet. But today we take them for granted and can't imagine our life without these inventions. I think that the Internet (or WorldWideWeb) is the greatest invention ever and it has made a significant impact on our lives.

Nowadays the Internet is affordable almost for anyone and it connects people all around the world. You can stay in touch with your friends, relatives and colleagues. Our modern life will stop without the net because it helps to make on-line business transactions, manage our bank accounts, pay our gas or electricity bills and send important e-mails, for example.

The Internet is the largest source of information. There are millions of Internet sites storing plenty of useful data about everything: science, history, psychology, sports, fashion, music, cooking and many other subjects. We can also download our favourite movies or songs, listen to radio channels or play games. Learning or practising foreign languages is possible with the Internet too.

The Internet saves our time and money. We can do on-line shopping choosing the desirable thing at the best price. And then we just click "Order the delivery". By the way, we can also sell various things in the net. We often don't need to go to the library: surfing the net can easily help us to find and open the book we need. Buying stamps and envelopes isn't required if you're going to send an e-mail. It takes just a few seconds to send an instant message by e-mail.

The Internet helps shy people or those with low-esteem to find each other on dating sites. On-line chatting through social networking websites is more comfortable for Internet users with the lack of social skills.

3-BILET

1. Complete the sentence with the correct relative pronoun.

The man **who** is speaking to our teacher is my uncle.

2. Read the paragraph and tell your opinion. It's not difficult to see that having certain abilities means that you can do certain jobs much better. If you have an ability to make friends quickly and get on with other people, it would be easier for you to work in a shop. If you are good at technical machinery and interested in operational problems, you should be an engineer. We should think about our personal strengths and weaknesses so that we can choose something more in line with our natural abilities.

In my opinion everybody should choose their profession according to their abilities. If they have a good ability for some type of work, it's easy for them to succeed in that field. If they don't have ability, and interest to their work, they hardly manage to be successful. For example, I think I have ability working with small children. I guess teaching is my profession.

3. Speak on the theme "My future profession".

There are a lot of interesting and useful professions. I am going to become a teacher. I suppose my future profession to be one of the most important nowadays.

My future speciality is English (Literature, Russian, History, Geography). I love children very much and to become a teacher has been my dream since my early childhood.

To teach and to bring up children is the most important and noble thing, to my mind. I am eager to get the proper education to be able to do my best to teach my future pupils my favourite subject. I'll try not only to help them to master it. I'll try to help them to become good and clever people, to be honest, kind and noble.

Children are our future and I want them to be really good and educated people. Of course, the profession of a teacher is not an easy one. It demands a lot of knowledge, a lot of tenderness of feeling and sometimes a lot of patience. But I hope, that I'll be a good teacher and that my pupils will like me and my subject.
